

Q:Two APs have the same common difference.The difference between their 100th terms is 100,what is the difference between their 1000th terms?

Solution:

Let us assume given two APs(Arithmetic Progressions) as X and Y whose first terms are given by $x(0)$ and $y(0)$. Let d be the common difference of the APs.

We know that,

n th term of an AP is given by

$$x(n) = [x(0) + (n)d]u(n) \quad (1)$$

$$x(99) - y(99) = 100 \quad (2)$$

$$\Rightarrow (x(0) + 99d) - (y(0) + 99d) = 100 \quad (3)$$

$$\Rightarrow x(0) - y(0) = 100 \quad (4)$$

Now to find the difference between the 1000th terms of APs;

$$x(999) - y(999) = (x(0) + 999d) - (y(0) + 999d) \quad (5)$$

$$= x(0) - y(0) \quad (6)$$

$$= 100 \quad (7)$$

Therefore,the difference between the 1000th terms of two given APs is 100.

We know that,

The Z-transform of a discrete signal $x(n)$ is given by:

$$X(z) = \mathcal{Z}\{x(n)\} = \sum_{n=-\infty}^{\infty} x(n)z^{-n}$$

Considering $x(n-1)$ and $y(n-1)$ as n^{th} terms of the APs(Arithmetic Progressions), Z-transform for $x(n-1)$ and $y(n-1)$ can be given by

$$X(z) = \mathcal{Z}\{x(n)\} = \sum_{n=-\infty}^{\infty} x(n)z^{-n} \quad (8)$$

$$= \sum_{n=0}^{\infty} x(n)z^{-n} \quad (9)$$

$$= x(0)z^0 + x(1)z^{-1} + x(2)z^{-2} + \dots + x(n)z^{-(n)} \quad (10)$$

$$= x(0) + (x(0) + d)z^{-1} + (x(0) + 2d)z^{-2} + \dots + (x(0) + nd)z^{-n} \quad (11)$$

$$= x(0)[1 + z^{-1} + z^{-2} + \dots + z^{-n}] + d[1.z^{-1} + 2.z^{-2} + \dots + n.z^{-n}] \quad (12)$$

$$= x(0)U(z) + d[1.z^{-1} + 2.z^{-2} + \dots + n.z^{-n}] \quad (13)$$

$$= x(0)U(z) + d[-z \frac{d(U(z))}{dz}] \quad (14)$$

$$Y(z) = y(0)U(z) + d[1.z^{-1} + 2.z^{-2} + \dots + n.z^{-n}] \quad (15)$$

$$(16)$$

$$X(z) = x(0)U(z) + d(-z) \frac{d(U(z))}{dz} \quad (17)$$

$$Y(z) = y(0)U(z) + d(-z) \frac{d(U(z))}{dz} \quad (18)$$

$$(19)$$

Variable	Description	Value
$x(n)$	n^{th} term of X	none
$y(n)$	n^{th} term of Y	none
d	common difference between the terms of AP	none
$X(z)$	z-transform of $x(n)$	none
$Y(z)$	z-transform of $y(n)$	none
$U(z)$	z-transform of $u(n)$	$\frac{1}{1-z^{-1}}, z > 1$
